Why You Need SteriShoe®

The combination of sweat and heat inside your shoes makes a perfect breeding ground for the bacteria and fungi that cause toenail fungus, athlete's foot, and foul odor. Human feet sweat up to half a pint (8 ounces) per day, per foot and we do nothing to clean the inside of our shoes! And when foot ailments exist, shoes can be a common source of re-infection.

Therefore, to fully minimize the likelihood of a new infection or re-infection, germs must be eradicated at the risk source! Make the doctor recommended SteriShoe® sanitizer part of your trusted total foot care protocol today.

How SteriShoe® Works

The innovative SteriShoe® shoe sanitizer kills the germs that reside inside shoes with a special germicidal ultraviolet light (UVC).

With the first treatment, **99.9%** SteriShoe® destroys up to of the microorganisms in shoes, including the bacteria and fungi that cause toenail fungus (onychomycosis), athlete's foot (tinea pedis) and offensive foot odor.

SteriShoe® is also an excellent choice for those with diabetes or generally concerned about their feet's hygiene.

The SteriShoe® sanitizer is:

- Scientifically proven to destroy microorganisms.*
- Accepted by the American Podiatric Medical Association.
- Very easy, safe and convenient to use. Just plug it in and push a button!
- Effective on the microorganisms that cause toenail fungus, athlete's foot, and offensive foot odor.
- Non-toxic. Uses no harsh chemicals, sprays or drugs to kill bacteria, fungi, and germs.
